

Variable equalizers are intended for compensating of the cable AFR and leveling of the TV signal levels in television reception systems.

SPECIFICATION

Model	VEQ-450 FT	VEQ-860 FT
Frequency range, MHz	40-450	40-862
Slope control depth, dB, or better	12 (48 MHz)	16 (48 MHz)
Insertion loss, dB, or less	2 (48 MHz)	3 (48 MHz)
Return loss, dB, or better	10,9	10,9
Max pass current, mA/V	200/25	200/25

TYPICAL AFR
